Team 9 - 5. Retrospective notes

Sprint 1 retrospective notes

Retrospective date: Aug 4, 2023

Question	Answer
What worked well?	 Team member Mihhail: We were very aware of the deadlines and worked hard to meet them. We were also very good in time management that we managed to do the bonus assignment, too. Team member Martin: I feel like we had very good teamwork! I was able to rely on my team members that their part will be done with good quality. Team member Sten: The teamwork was very smooth and felt like it's "too good to be true". Everything member worked hard and put out quality work!
What could be improved?	 Team member Mihhail: So far there have not been issues we'd need to consider to improve on. Keep up the determination! Team member Martin: We can always work on our communication- even if it's just chit-chat. The more we bond, the smoother everything gets. Team member Sten: We could use the chat more to share our thoughts about assignments or just everyday lives.
What will we commit to doing in the next Sprint?	 Team member Mihhail: Finish all our tasks on time or even earlier, if possible. Quit our jobs to fully focus on the course (a joke) Team member Martin: Use the chat and communicate more. Also focus on the deadlines. Team member Sten: Finish all the tasks on time for the best possible grade!

Sprint 2 retrospective notes

Retrospective date: Aug 30, 2023

Question	Answer
What worked well?	Team member Mihhail: I think the team was very cohesive and all the assignments due were completed successfully. The teamwork seriously helped us reach the

	deadlines.
	Team member Martin:
	I feel like all the tasks were evenly distributed so there was no "overworking" by anyone. The promises the team members gave were all kept.
	Team member Sten:
	The teamwork was top notch and the communication was constant throughout the project. Everyone was helping each other out when needed.
What could be improved?	Team member Mihhail: Everything worked but working on personal time management is always beneficial.
	Team member Martin:
	Sometimes it's best to keep in the frame of the assignment and not to try to do too many things at the same time.
	Team member Sten:
	 Personally I felt like time management for myself was an issue this time around- some days I was physically unable to even think about the project but some days I was working 6-8 hours a day.
What will we commit to doing in the next	Team member Mihhail:
Sprint?	I'm looking for active participation from my next team and hopefully the communication is as good, if not better.
	Team member Martin:
	 Be prepared from the get-go as project 3 is going to be, as per the mentors, something completely new.
	Team member Sten:
	Communicate more openly and try to have the group feel more comfortable with one-another.

Other notes:

• We hope that Project 3 is going to be more engaging from start to finish and the structure between assignments could be more logically built.
