Team 9 - 4. Final testing report

Testing report

Squad Jira board: Team9 🔲 T7. Company collaboration platform

The version of application: 4.0.3

Test scenario and Test case	Description	Martin Maasik Date of retesting Module 1- 4: 23-26.08 Retesting environment: v 4.0.3 **Environment**: Windows 10 **Browser**: Google Chrome	Mihhail Bauer Date of retesting Module 1- 4: 23-26.08 Retesting environment: v 4.0.3 **Environment**: Windows pro OS: 10; **Browser**: Firefox: Version 116.0.3 (64-bit)	Sten Aju Date of retesting Module 1- 4: 23-26.08 Retesting app environment: v 4.0.3 **Environment**: Android 13 SM-S906B Build/TP1A.220624014 **Browser**: Chrome 114.0.5735.130
1. Login				
LI001	Check that system behaves correctly when correct username and password are given	✅ Passed	Passed	Passed
LI002	Check that correct error message will be given when using wrong email(Email without '@' sign)	✅ Passed	Failed 🔲 T7CCP-580: LI002. Correct error message will be given when using wrong email (Email without '@' sign) TO DO	Passed
LI003	Check correct error message will be displayed when wrong password will be given	✅ Passed	Passed	Passed
LI004	Check correct error message will be displayed when user and password fields are empty	✅ Passed	Passed	Passed
LI005	Check correct error message will be displayed when email field is empty but correct password is given.	✅ Passed	Passed	Passed
LI006	Check correct error message will be displayed when correct email is given but password field is empty	✅ Passed	Passed	Passed

LI007	Check that email field is case sensitive. Give correct email but in uppercase and password in correct case	✅ Passed	Passed	Passed
LI008	Check that password field is not case sensitive. Give correct email but change password from lower- to upper case	✅ Passed	Passed	Passed
LI009	Enter invalid email and password multiple times. Check that user login will be set idle for period of time	✅ Passed	Passed (5 min cooldown)	Passed (5 min cooldown)
LI010	Test email length by entering too long email but valid password (Length needs to be discussed with product owner)	⚠️ Test Case to be discussed with product owner by business logic.	Test Case to be discussed with product owner by business logic.	Test Case to be discussed with product owner by business logic.
LI011	Check that system behaves correctly when correct username/email will be given but blank space before it and right password are given	✅ Passed	Failed 🔳 T7CCP-582: LI011. System behaves correctly when correct username/email will be given but blank space before it and right password are given. **TO DO**	Passed
LI012	Check that system behaves correctly when correct username/email will be given but blank space after it and right password are given	✅ Passed	Failed 🔳 T7CCP-584: LI012. System behaves correctly when correct username/email will be given but blank space after it and right password are given. **TO DO**	Passed
LI013	Check that system behaves correctly when correct top level domain in email is only one character long	✅ Passed	Passed	Passed
LI014	Check that system behaves correctly when correct top level domain in email is not registered. List of registered top level domains	✅ Passed	Passed	Passed

LI015	Check that users can't bypass log-in to get into system	❌ Failed 🔳 T7CCP-166: Login page - the customer is able to log in without an account. `TO DO`	Failed 🔳 T7CCP-166: Login page - the customer is able to log in without an account. `TO DO`	Failed 🔳 T7CCP-166: Login page - the customer is able to log in without an account. `TO DO`
2. Logout				
LO001	Check that user stays logged out if 'log out' button is used	❌ Failed 🔳 T7CCP-164: Login page - unable to log out `TO DO`	Failed 🔳 T7CCP-164: Login page - unable to log out `TO DO`	Failed 🔳 T7CCP-164: Login page - unable to log out `TO DO`
LO002	Check that user is logged out from all browser instances, if he/she has logged out in one instance	❌ Failed 🔳 T7CCP-560: Log Out - Exit session from all browser instances `TO DO`	Failed 🔳 T7CCP-560: Log Out - Exit session from all browser instances `TO DO`	Failed
3. Directory page				
DP001	Directory module bookmarks work.	✅ Passed	Passed	Passed
DP002	Directory module email icon work.	❌ Failed 🔳 T7CCP-530: DP002. Directory module - floating tooltip over email icon `TO DO`	Failed 🔳 T7CCP-530: DP002. Directory module - floating tooltip over email icon `TO DO`	Unable to test as no cursor is available on Android tests to hover over the icon. When clicked, the icon itself works.
DP003	Directory module call icon work.	❌ Failed 🔳 T7CCP-531: DP003. Directory module - floating tooltip over telephone icon `TO DO`	Failed 🔳 T7CCP-531: DP003. Directory module - floating tooltip over telephone icon `TO DO`	Unable to test as no cursor is available on Android tests to hover over the icon. When clicked, the icon itself works.
DP004	Directory module search bar and filters icon/button.	❌ Failed 🔳 T7CCP-473: Directory page - "Filter" button does not exist `TO DO`	Failed 🔳 T7CCP-473: Directory page - "Filter" button does not exist `TO DO`	Failed 🔳 T7CCP-473: Directory page - "Filter" button does not exist `TO DO`
